

A range of thermal transfer ribbons for all applications

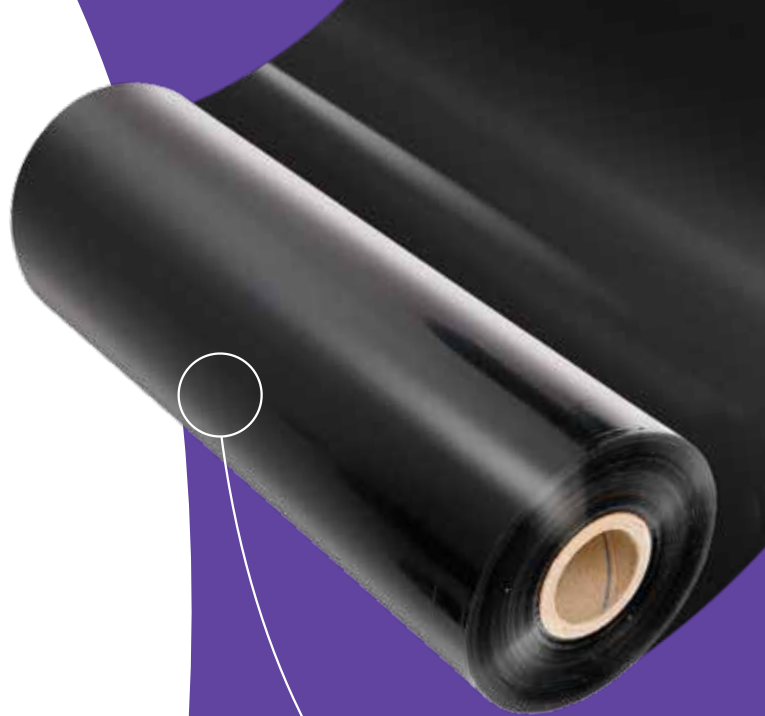

The Paper Chain offer a stock range of thermal transfer ribbons suitable for use in all types of thermal transfer printers including desktop & Industrial printers, In-Line Coding printers and Print & Apply systems.

We can supply a ribbon for every type of thermal transfer printer on the market including **Allen Coding, Argox, Avery, CAB, Carl Valentin, Citizen, Datamax, Godex, Intermec, Markem, Printronix, Sato, Tharo, Toshiba, TSC, Zebra.**

Each ribbon grade has been selected based on quality, reliability, value and its ability to cover a wide range of applications.

Colour Thermal Transfer Ribbons

The Paper Chain offers a very good selection of different colour ribbons and a service to custom produce any colour as required. This colour range is by far one of the most comprehensive in Europe.

Our ribbon grades are manufactured to exceed OEM quality standards

- More than 400 sizes available from stock. Most shipped on a next day basis
- Ribbons for every make of thermal transfer printer
- Back coated with material that offers the highest protection for your printheads
- Manufactured with release layers that ensure the lowest possible energy is required
- Selected to cover 95% of all applications
- Available in a wide range of colours

Samples

Free of charge samples are available for all of the grades in our range. All are available for next day delivery.

A range of thermal transfer ribbons for all applications

	Grade	Flat Head	Near Edge	Compatible Substrates	Example Applications	Comments
WAX	TPCF1	•		Vellum, uncoated, matt coated & semi-gloss papers, tag board		Best choice for general purpose labelling
	TPCF2	•		Vellum, uncoated, semi-gloss, full gloss, flood-coated & synthetic paper, tag board, polyethylene, polypropylene, UV varnished labels		General purpose labelling with extra durability
WAX RESIN	TPCF3	•		Coated, uncoated, gloss, synthetic, flood-coated paper, coated & uncoated tag stocks, polyethylene, polypropylene, polyolefin, UV varnished labels		Great print performance with very good durability
	TPCF4	•		Coated, uncoated, gloss, synthetic, flood-coated paper, coated & uncoated tag stocks, polyethylene, polypropylene, polyolefin, UV varnished labels		Great print performance with excellent scratch resistance
	TPCN1		•	Coated, synthetic & medical paper, coated tag materials, polyethylene, polypropylene, polyolefin, most types of flexible packaging films		Very versatile for all types of labels and packaging films
	TPCN1X		•	Coated, synthetic & medical paper, coated tag materials, polyethylene, polypropylene, polyolefin, most types of flexible packaging films		Coated on 4.0-micron film for longer length ribbons
	TPCN2		•	Coated papers, Polypropylene, polyester, most types of packaging films		For extra durability and higher print speeds
RESIN	TPCF5	•		Coated & synthetic paper, polyolefin, polyester, polypropylene, polyethylene, Vinyl		Extra scratch resistance on synthetic labels
	TPCF6	•		Nylon, Polyester, Acetate, Rayon, Polyethylene, Polypropylene, PVC, PET		Excellent print on textiles with wash resistance
	TPCN3		•	Medical, coated & uncoated paper, polypropylene, polyethylene, polyolefin, nylon, polyester films		Extra durability to heat and abrasion with high print speeds

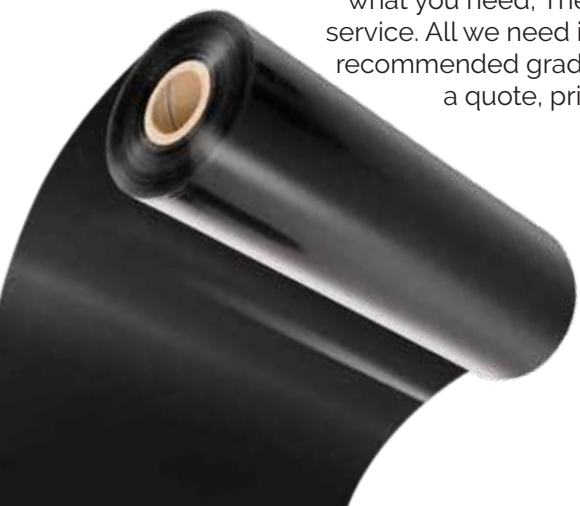

Example Applications

Testing Service

If you need to find a suitable ribbon for your application but are unsure of what you need, The Paper Chain can help with our free of charge testing service. All we need is several metres of label material. We will test all of our recommended grades and send you details of the most suitable including a quote, printed test results and a free of charge sample.

Please ask for more details.
